

Day 05 Report – Understanding HTTP Through Burp Suite

Introduction to HTTP

Definition

This chapter explains introduction to http and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Browser–Server Communication

Definition

This chapter explains browser–server communication and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Burp Suite Architecture

Definition

This chapter explains burp suite architecture and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Understanding Requests

Definition

This chapter explains understanding requests and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Understanding Responses

Definition

This chapter explains understanding responses and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

GET vs POST

Definition

This chapter explains get vs post and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

HTTP Headers

Definition

This chapter explains http headers and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Status Codes

Definition

This chapter explains status codes and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Cookies

Definition

This chapter explains cookies and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Sessions

Definition

This chapter explains sessions and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

CSRF Protection

Definition

This chapter explains csrf protection and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Real Traffic Analysis

Definition

This chapter explains real traffic analysis and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Security Analyst Mindset

Definition

This chapter explains security analyst mindset and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Practical Exercises

Definition

This chapter explains practical exercises and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.

Summary

Definition

This chapter explains summary and its role in web application security.

Workflow

Browser → Request → Server → Response → Browser

Example

Example observed during Burp Suite traffic analysis and HTTP inspection.
